

With its corporate responsibility culture and commitment to the UN Global Compact, Yüksel Holding published economic, social and environmental performances of Yüksel companies to its stakeholders. According to the written announcement from Yüksel Holding, Yüksel published its second “Riseability” report. The first Riseability report, published in 2012, was the first sustainability report for the (Turkish) construction sector and many other sectors where Yüksel companies involve. Riseability II was prepared with the commitment to the United Nations Global Compact, transparency and corporate governance values. Yüksel has published Communication on Progress reports since 2008. For the last two years, these reports has been prepared in accordance with the GRI standards and showed the environmental and economic contributions of the Yüksel companies. General Coordinator of Yüksel Holding, Tuna Aksel stated that with the guidance of sustainability oriented companies, private sector gradually will be more responsible. According to Aksel, while natural resources are decreasing, the consciousness of “corporate citizenship” and the support of civil initiatives are crucially important for a sustainable world.
